

Introducing a NEW approach to PACS — An affordable and flexible solution.

Our fully web-enabled and scalable PACS solutions help transition your practice into a safe, secure, and filmless environment. As a scalable PACS solution that supports all your current and future imaging needs, Clarity PACS™ offers a web-enabled solution to enhance your workflow. Customization ensures that each physician and facility can maximize the possibilities in Clarity PACS.

Clarity PACS is designed to give you the tools you need, with the support you need, every day. Our in-house customer support team is just a phone call away. Clarity PACS offers remote configuration and monitoring to ensure maximum uptime; allowing you to set up and begin using your system immediately.

No Down Time:

We will install your system and train you in less than a day.

Low Cost of Entry:

In-house software development makes this system reliable and affordable.

Easy to Maintain and Upgrade:

Clarity PACS upgrades remotely.

CLARITY PACS™

P A C S M A D E C L E A R

Web-Based PACS at an Affordable Price

Clarity PACS™ web viewer is an advanced Radiology viewer that can be configured to launch directly from an internet browser. The robust and clinically proven web viewer is part of the Clarity PACS system that is designed to optimize workflow in all healthcare environments. The web viewer has multi-monitor functionality, and is ideal for all modalities.

Clarity PACS Features

HANGING PROTOCOLS

Clarity PACS includes modality or practice specific hanging protocols.

MULTIPLE VIEWING LICENSES

Expand the reach of data facility-wide for streamlined workflow and enhanced patient care.

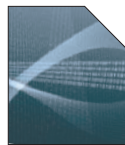

WEB-ENABLED CAPABILITY

Access your data anywhere in the world with our powerful web viewer.

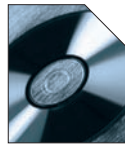

STRUCTURED REPORT WRITER

Easily create Radiology reports utilizing customized templates.

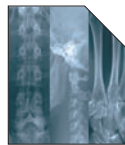

ADMINISTRATION TOOL

Lower administrative support costs by utilizing easy and fast PACS administration.

EASY CD/DVD CREATOR

Quickly copy studies for patients and referring physicians.

MULTI-MODALITY SUPPORT

Receive imaging data from CR, DR, Ultrasound, MR, CT, and more.

AUTOMATIC DICOM ROUTER

Rule based auto-route from primary archive to external DICOM targets.

GREY SCALE PRESENTATION STATES

Customize GSPS to your viewing preferences for optimized workflow.

EASY HL7 INTEGRATION

Integrate with front office practice management systems like EMR, RIS, and others.

IMAGING AND ANNOTATION TOOLS

Numerous tools available including: Cobb Angle, Center Line, Cine, and Smart Filtering.

SMART WINDOW LEVEL

Adjust window levels with ease utilizing this intuitive, smart tool.

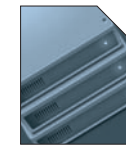

DICOM IMPORTER

Clarity PACS can import JPEG, PDF or other DICOM objects.

DYNAMIC WORKLIST AND VIEWER PREFERENCES

Customize Clarity PACS filtering options in addition to color schemes and fonts.

SCALABLE ARCHIVING SOLUTIONS

Clarity PACS archive can be scaled up to tens of terabytes in RAID 5 configuration.

REMOTE CONFIGURATION AND MONITORING

Clarity PACS can be configured and monitored remotely to ensure maximum uptime.
